

Aaditi Dharmendra Bhandari

+1 (980)201-1450 | Charlotte, NC, USA | [LinkedIn](#) | aaditibhandari6@gmail.com | [GitHub](#) | [Portfolio](#)

Objective

A Data Science graduate student with expertise in machine learning, statistical modeling, and large-scale data analysis. Skilled in Python, SQL, and data visualization to develop forecasting models, performance measurements, and insights from optimization that boost operational efficiency and facilitate data-driven decision-making.

Education

- Master of Science in Data Science: (2024 – 2026)** **GPA: 3.9/4**
University of North Texas, Texas, USA
- Master of Science in Computer Science: (2020 – 2022)**
H.V.Desai College, Pune, India

Experience

Data/Business Analyst

Sports Excitement LLC | Queens, New York

Jan'26-Present

- Analyze user behavior, marketing data, and product performance from multiple sources to generate actionable insights that guide product and marketing strategy.
- Conduct A/B testing, trend analysis, and user segmentation to optimize marketing campaigns and improve user acquisition and engagement.
- Develop interactive dashboards and visual reports in Power BI/Tableau to track KPIs such as engagement, retention, conversion rates, and campaign performance.
- Built predictive models to forecast user acquisition trends and support data-driven strategic planning.
- Collaborate with product, marketing, and design teams to present data-driven recommendations, supporting evidence-based decision-making and business growth

Vice President of Communications and Marketing (On-Campus)

Aug'25-May'26

Graduate Student Council, UNT | Denton, Texas

- Led marketing campaigns and analyzed student engagement metrics to optimize event participation.
- Managed digital platforms and collaborated with campus organizations to improve outreach and community visibility.
- Applied data-driven insights to measure and report on the effectiveness of events and initiatives.

Power BI Analyst

Nov'22-Apr'24

HiLine Solutions | Pune, India

- Built and optimized Power BI dashboards using data modeling and DAX to track key metrics and support data-driven decision-making.
- Extracted, cleaned, and transformed data using SQL to ensure high-quality datasets for accurate analysis and reporting .
- Partnered with cross-functional teams to translate business needs into clear, impactful visual reports.

Skills

- Programming & Data Handling** : Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), C, C++, JAVA, SQL, PL/SQL, CSS, HTML, XML
- Data Visualization** : Power BI (DAX), Tableau, Looker
- Statistical & Analytical Skills** : Data Cleaning & Wrangling, Hypothesis Testing, Regression, Correlation, Predictive Modeling, A/B Testing, Data Mining
- Machine Learning & AI Basics** : Regression, Classification, Clustering, Feature Engineering, NLP(Basics), LLM Integration, GPT-4/GPT-4o-mini, Batch Processing, Data Cleansing (Regex, BeautifulSoup)
- Databases & Cloud** : MySQL, PostgreSQL, Google BigQuery, Azure (Basics), Snowflake, SQL Optimization.

Projects

Data Cleansing with OpenAI

- Built end-to-end NLP pipeline to standardize 800K+ records, from SQL extraction to LLM transformation and database updates.
- Cleaned and preprocessed data using Regex and BeautifulSoup, preserving key business entities.
- Engineered GPT prompts for consistent, production-grade outputs at scale.
- Reduced costs 50% via batch processing and optimized SQL updates (5K+ records/batch).
- Designed fault-tolerant tracking and recovery for long-running (48+ hr) automation workflows.

AI-Powered Resume & ATS Matching Engine | LLM & Semantic Search

- Built and deployed an AI-powered Resume & ATS Matching System combining rule-based parsing, NLP, and local embedding models to evaluate resume compatibility and semantic alignment with job descriptions.
- Implemented AI-driven gap analysis to identify skill mismatches, recommended targeted resume improvements.
- Designed a cost-efficient inference architecture using local ML models for core processing, eliminating external API dependencies and recurring inference costs.

Breast Cancer Data Analysis

- Built and evaluated machine learning models (Logistic Regression, Random Forest, SVM) using Scikit-learn to predict tumor diagnosis outcomes.
- Improved model performance through feature selection and evaluation metrics (accuracy, precision, recall, ROC-AUC), identifying key predictors for clinical insights.

Certifications/Awards

- Snowflake Build 2025-2026 Data Engineering Bootcamp
- Snowflake Build 2025-2026 Gen AI Bootcamp
- Microsoft Power BI
- UNT Toulouse Graduate School (TGS) Scholarship
